SCHOOL REPORT—1933-1934**REPORT OF THE SUPERINTENDENT OF SCHOOLS**

To the Superintending School Committee and the Citizens of the Town of Sidney.:

I hereby present my first annual report of the condition and progress of the schools.

In the arrangement of this report I have attempted to eliminate all items which would appear to be lacking in interest to officials, parents and tax payers, but to include all information necessary or desirable for a clear comprehensive view of the work of the schools. We need no reminder of the economic stress through which we have been passing. Its presence has been keenly felt the world over. Curtailment has everywhere been the order of the day. And in this program of curtailment we feel confident that the school has assumed at least a fair share of the responsibility.

I would respectfully call attention to the following table which shows the expenditure and distribution of the school dollar.

Teachers' Salaries	\$0.43
Janitors' Services	.016
Conveyance	.18
Fuel	.032
Secondary Tuition	.222
Books and Supplies	.06
Supervision	.03
Repairs	.03

	\$1.00

From the above figures it would seem that the distribution has not been excessive in any one department of the school costs. The expenditure for textbooks has been considerably above the amount appropriated for that purpose by the Town. The balance was met through the State Equilization Fund which is provided for such purposes. The very pronounced shortage of

books and supplies in the schools at the beginning of this present school year, and the fact that both of these items are going up or have already gone up in price, seemed to justify the expenditure in this department. The appropriation for next year, for these items, need not be quite so large as usual, because of this expenditure. However, it should not be reduced to the point that the successful operation of the schools may be endangered.

Two other items we would mention in passing. Conveyance, it appears, has always been an unavoidably heavy expense to the Town. This year the expenditure has been considerably reduced, in keeping with the general reduction.

High School Tuition costs account for more than one fifth of the school dollar. This is, of course, a necessary item, and one that cannot be determined by the tax payer. The law provides that, on condition of satisfactory scholastic standing, tuition shall be paid if no free high school is maintained by the town. However, the Town is under no obligation to pay tuition for any student who does not apply himself or herself to the extent of doing satisfactory work in the high school which he or she may be attending. This throws the responsibility, then, upon the student, and we feel that the Town should not be asked to pay tuition for those students who have no desire to take advantage of the opportunity offered them.

We have had no opportunity to compare the work of the schools for this year with the work of other years, and we can only say, then, that we believe the work accomplished during the past half year has been, generally, of good quality.

We have attempted to introduce a few changes in methods and administration. It has seemed that perhaps more attention could be given to reading in all of the schools. The importance of this work needs no defense. It is universally agreed that reading ability is the prerequisite of good work in all fields of study, and should certainly be given every opportunity for development. Reading habits are formed in the early years; we have therefore begun with the lower grades by the introduction of a new standard reading system to be followed by all teachers. We feel confident that the results will justify the course entered upon.

The school year of thirty-two weeks is, without question, too

short for the accomplishment of the amount of work generally expected of the schools. It should be at least two, if not four weeks longer if we would accomplish what we are expected to, and compare favorably with systems that have the full thirty-six week year.

The repair work carried out under the Civil Works Project has been appreciated in every school in Town. The interior of every building is now in good condition, and all rooms are pleasant and clean. We believe that this fact will add much, through the attitude of the pupils, to the general morale of the schools. If possible, funds should be provided, to complete the repairs on the exterior of the buildings.

In closing this report we take this opportunity to express our thanks to the School Committee, who, through their progressive assistance and their loyal support have contributed so much to the success of the past year.

We would also thank each and every teacher, new to the position or of long standing in the system, for their thorough cooperation and willing work.

And finally, we would say to each and every parent and supporter of the schools that we appreciate the attitude toward the schools, and that we anticipate the same cooperative spirit throughout the coming year.

Respectfully submitted,
 I. E. ADAMS,
Superintendent of Schools
